Part 2 of 9  
Assessment Statistics

City Council

# **SHELAA 2023/2024 ASSESSMENT STATISTICS**

1. The outputs from the SHELAA can be used to calculate gross figures for area of land available and indicative number of dwellings (yield) deliverable outside of that already identified within the Council's Housing Site Schedule.
2. To calculate this, a refinement of the SHELAA sites is first undertaken. SHELAA sites which have an approved planning consent or have been allocated within the Local Plan are included within the Council's Housing Site Schedule. Therefore, the gross outputs would represent, potentially significant, double counting of land and a double counting of indicative yield within the various site categories. As a result, the area and yield of these sites are discounted to give a more accurate picture of the quantum of land available.
3. Additionally, there are instances where submissions lie wholly within other submissions. Again, to avoid a double counting of yield and area, these sites are also discounted from the outputs.

### **Limitations of the statistics**

4. It should also be noted that there are some sites which overlap each other. Since some of these overlapping sites may fall within differing categories and have varying levels of Greenfield/PDL splits between them it is impossible to discount site areas and site yields in a fair and consistent manner. As such the reporting output figures should be viewed with some caution as, although most of the double counting has been removed, there will be elements of site overlapping, but is not possible to give an accurate figure for how much and in which categories.
5. Furthermore, the indicative number of dwellings for each SHELAA site has been generated solely using the assumptions from the Viability Study that supports the Achievability element of the SHELAA. The Viability Study follows a typology approach. A number of assumptions have been made to establish each typology including build form and scale, density, and gross-to-net development ratios. Each SHELAA site is attributed a typology and using the typology assumptions along with the size of the SHELAA site, an indicative figure for the number of dwellings (yield) can be calculated. The figure DOES NOT dictate the number of dwellings that can/should/will be delivered on site, as it does not factor Suitability nor Availability considerations. Instead, is just reflecting what the Viability Study has tested to gauge the Achievability of the site.
6. For the purpose of these statistics, this indicative yield is used as it is the best gauge that we have available to us.

### **Outputs: 2023/2024 Assessment**

7. The 2023/2024 SHELAA assessed a total of 385 sites, of which 74 sites have been discounted from the calculations of available land below. Of these 74 sites, 33 have either been allocated within the Local Plan or have an approved planning permission, whilst the remaining 41 lie wholly within another SHELAA submission. As stated in above, these sites areas and indicative yields have been discounted to avoid, potentially significant, double counting. Tables 1 and 2 below provide details of these 74 sites:

**Table 1:** SHELAA sites allocated within the Local Plan or have an approved planning permission, where the permission covers the entire SHELAA submission.

8. Considering the above, the following overall figures have been discounted from the SHELAA total outputs.

**Table 3:** Figures discounted from the SHELAA outputs

9. Taking account of the above discounts, the SHELAA outputs are detailed below in Tables 4, 5 and 6.

**Table 4:** Proposed Uses

Proposed Use	Number of Sites	Site Area (ha)
Residential	260	1,687.664
Employment	19	278.753

Community Facility	3	108.035

<b>TOTAL</b>	<b>311</b>	<b>3,499.575</b>	<b>51,395</b>

10. As can be seen from Table 5, a yield of 2,496 dwellings may be achieved from Green sites and 2,254 from Yellow sites. Amber and Red sites, those which are not currently developable, amounts to 46,645 dwellings.

**Table 6: Contribution to housing Sites by Category and land type**

	Previously Developed Land			Greenfield			Yield Total
	No. Sites	Area (ha)	Yield (dwellings)	No. Sites	Area (ha)	Yield (dwellings)

11. Table 6 provides a greater level of detail including the land type. The indicative yield of previously developed (brownfield) dwellings from Green sites amounts to 55, compared to a yield of 2,441 greenfield dwellings. The indicative yield of previously developed (brownfield) dwellings from Yellow sites amounts to 0, compared to an indicative yield of 2,254 greenfield dwellings. Finally, the Amber and Red rated sites together yield 1,857 dwellings from previously developed (brownfield) sites and 44,788 dwellings from greenfield sites.
